Subject: RE: Gilt Edge Settlement Info. for ICIS form

That's the amount indicated in the Consent Decree to be paid to the EPA.

Hi Sharon,

We received a report from DOJ that is showing the Cost Recovery for this specific Gilt Edge Mine Site at \$9,270,000. Does that sound accurate?

Hi Jocey,

These are all separate CDs but they are all for a site-wide settlement for past and future costs. Cyprus, Homestake, CoCa and Commonwealth are the only ones who have contributed funds. The others are ability to pay settlements and we will, more than likely, never collect anything from them. The CDs for the ability to pay parties states that if they find insurance money, they will turn it over to EPA.

The numbers I gave to you is for the entire site. I'm not sure how we do this.... Superfund always seems to have exceptions to the rules especially when it comes to forms! Maybe we could put "0" for volumetric numbers for the ability to pay parties and split the total amongst the 4 paying parties???? What do you think, Aaron?

Sharon

Currently we have 8 (Coca Mines being the 8th) CDs associated with Gilt Edge. I've posted the list below. They all have varying amounts of outcomes, some with none reported in any of the categories. I'm not sure if what was reported in the past is accurate, or if all of these settlements should be grouped together?

Enforcement Action Identifier: 09-2007-0215
Enforcement Action Name: Gilt Edge Mine Site
Issued By: EPA
Forum: Judicial

Final Order ID	Name	Type	Date Lodged	Date Entered	Date
1	Gilt Edge Mine Site - CEGA	Consent Decree or Court Order Resolving a Civil Judicial Action	12/10/2009	02/08/2010

Jocey,

All of our Gilt Edge settlements are for Sitewide past and future costs.

Will you need to divide the total cubic yards and gallons of wastewater into all the settlements?

Here's the volumetric information:

Wastewater: 172 million gallons being treated

Acid Waste Rock: 1,642,000 cubic yards

Please let me know what else you need.

Thanks.
Sharon
